Trip Itinerary:

Friday late afternoon, we will drive up to the Curtis Reed Scout Camp located in Brant Lake, NY just north of Lake George Village.

Each scout needs to bring a sleeping bag and pillow for their camp bunk.

Sat morning after a great breakfast, we will depart for Gore Mountain where the first morning we will take a 90 minute advanced lesson to work on improving our skiing or boarding skills.

In the afternoon we will tour the mountain in Blue and Black level groups

Sat night we will have a terrific dinner at the Base camp and talk about our adventures of the day.

Sun morning after another great breakfast, we will depart for Whiteface Mountain, a world class Olympic mountain, the highest skiable terrain in the North East. We will tour the mountain in Blue and Black level groups.

Bag lunch is provided each day.

Note: This Scout Ski Weekend is for scouts who are comfortable on Blue square trails or better.

This is also related to the ski shop rental question - when renting equipment. Type 2 skiers are considered Blue Level Skiers

If you are not comfortable telling the ski shop to set your bindings for Type 2 or higher then you should not attend this trip. Our Bus trip in March is for all levels and types.

Type 1 Skier

A type 1 skier prefers skiing cautiously and at slower speeds. This skier is most comfortable on smooth slopes of gentle to moderate pitch. As a type 1 skier you prefer lower than average release/retention settings so in the case of a fall your bindings are more likely to release.

A type 1 skier is an entry level skier uncertain about their classification.

Type 2 Skier

A type 2 skier prefers a variety of speeds. A type 2 skier will ski on varied terrains and explores different parts of the mountain. If a skier cannot decide that they are a 1 or 3 they are a 2.

A type 2 Skier prefers average release/retention settings appropriate for most recreational skiing.

Type 3 Skier

A type 3 skier prefers faster speeds. A type 3 skier likes going fast and skis aggressive on slopes of moderate to steep pitch. Type 3 skiers prefer higher than average release/retention settings.

As a type 3 skier they prefer decreased releasability in a fall in order to gain a decreased risk of inadvertent binding release.

The following is a checklist of suggested equipment:

- | | |
|---|--|
| <ul style="list-style-type: none"> • Ski/board Winter jacket • Ski/board winter Gloves & Hat • Skis/board/boots/poles/Helmet • Ski/board snow pants • Ski Goggles • Ski Sweater • Thermal long johns | <ul style="list-style-type: none"> • Pajamas & Underwear • Sleeping bag and pillow • Small day pack • Towel & Toiletry Kit • Extra shirts and pants • Winter Boots • Ski/board winter socks |
|---|--|
